GROW GAIN™ 6-13-0

DENSE CANOPY COVER

Produce a dense leaf canopy using highly available nitrogen and phosphorus sources with supercharged biochemistry. Grow Gain is the ideal tool for recovery from aeration, heavy traffic, plant injury, and new seeding. Grow Gain will lead the recovery charge for your establishment.

INSIDE THE BOTTLE

GUARANTEED ANALYSIS

6.00% Nitrogen (N)	13.00% Phosphorous (P_2O_5)

DERIVED FROM

Nutrient source materials.

Urea-Ammonium Nitrate	Diammonium Phosphate	Density Building Biostimulants

WHY IT'S DIFFERENT

A TOOL FOR DENSITY

1. The biostimulant promotes turfgrass density by activating genes that stimulate cell division and cell elongation, driving rapid shoot and leaf expansion.
2. Nitrogen supports turf density by fueling chlorophyll, protein synthesis, and new shoot and tiller growth, helping the canopy fill in rapidly.
3. Phosphorus is essential in supplying energy for cell division and promoting strong root and shoot development, helping establish and sustain new growth.

HOW TO USE IT

Apply Grow Gain to improve density, emerge faster from dormancy, or supply available phosphorous. Grow Gain can be mixed with other Plant Fitness products, most fungicides, and plant growth regulators. Use caution when mixing with other nutrients, as the ingredients are highly reactive.

HOW MUCH	HOW OFTEN	COMPATIBILITY
60-270 mL / 100 m^2	7-14 Days	FERTILIZER FUNGICIDE PGR
