ACTIVE INGREDIENTS

15% Nonionic Surfactant	**2%** Cationic Surfactant
4.5% EDTA	

INERT INGREDIENTS

3% Potassium

PUSH PAST BARRIERS

Flexo is a high-performance infiltration surfactant engineered to push water and essential inputs deeper into the turf profile. Built for injection or spray applications, Flexo integrates easily into your agronomic program with unmatched tank mix compatibility and versatile application options. Flexo is perfect for getting rid of unwanted moisture in the root zone, flushing soils, and delivering key inputs where you want them.

- POWERFUL
- PENETRATING
- PERFORMANCE

HOW TO USE

Apply Flexo by injection or spray at 1.5 L/ha to improve water infiltration through tight soils, bicarbonate bound and thatchy soils. Adjust rates in 0.3 L/ha increments based on turf response and infiltration needs. For best results, use prior to excess rainfall or during periods of poor water quality use.

PRODUCT APPLICATION RATES

APPLICATION	USE RATES	FREQUENCY
Cool-season Turf	1.5 - 2.0 L/ha 400 - 800 L of water per hectare	7 - 14 days
Warm-season Turf	1.5 - 2.0 L/ha 400 - 800 L of water per hectare	7 - 14 days

PROGRAMS

FLUSHING

Flexo is the force behind water movement in a Plant Fitness program - essential for unlocking peak infiltration and movement of excess moisture and salts. It breaks through barriers that restrict water, allowing unparelled control over soil moisture.

Flexo is a trademark and Plant Fitness is a registered trademarks of Epoch Science, LLC.
